

Gabriel Furniture

Gabriel Furniture is a cabinet-maker specialising in handmade furniture, installations and one-off designs on a commission basis. Shown here is a wine rack which holds 58 bottles, but as the construction is modular it can be produced in any height. The wine rack is made from American black walnut and galvanised roofing, and is 78cm high, 52cm wide and 35cm deep.

Peter Scherer Studio

The Aluminium chair is comprised of open loops and sleek curves and is constructed from a single 8mm aluminium sheet. Its shape was conceived by folding and exploring cardboard and it looks similar to its prototype. The shape of the chair is water-cut from aluminium and then folded from 2D to 3D; its elegant, continuous form makes it hard to judge where the material starts and ends.

Muslavi Gallery

Muslavi Gallery's online site will enable the UK distributor to showcase a range of unique furniture and interior applications from the award-winning Polish artist and designer Remigiusz Laskowski. The collection centres on a range of steel tables, coffee tables, mirrors and shelves. Each piece is sprayed with a powder coating of pigment before the final workshop phase in which the vibrant pigment colour is carefully polished. Pictured is the Orient Fuchsia table.

Polyrey

Polyrey's laminates have been specified for the new Cento restaurant in Wimbledon. Bois Ebene is an exotic looking laminate that is a recent addition to Polyrey's Origine Premier range. It was specified as a key finish within the interior of the restaurant and cocktail bar. The high-gloss laminate was used in both horizontal and vertical applications on the bar front, surface mounted with Ice Cube lighting and as wall panelling behind the bar, providing a durable, easy maintenance finish.
